Introduction

TTI Emotional Quotient™

The TTI Emotional Quotient Report is designed to help individuals build awareness of five interrelated areas of emotional intelligence. It provides insights into current levels of activity across these areas, highlights how each may influence actions, and offers practical ideas for improvement. This report does not label, judge, or prescribe; it supports growth by helping individuals reflect on how they show up and interact with the world around them.

Emotional Intelligence (EQ) describes how individuals perceive, understand, and manage emotional information, both their own and that of others. It is not fixed or static; rather, it represents a set of internal and interpersonal capabilities that can be strengthened over time through increased awareness, intentional practice, and reflection.

Use this report to:

- Understand the emotional patterns that shape thinking, decisions, and actions.
- Recognize how different dimensions of EQ influence personal and professional performance.
- Identify growth opportunities tailored to individual strengths and blind spots.

This report is intended to support deeper self-awareness, encourage meaningful self-reflection, and offer accessible ways to translate insight into everyday impact.

Introduction

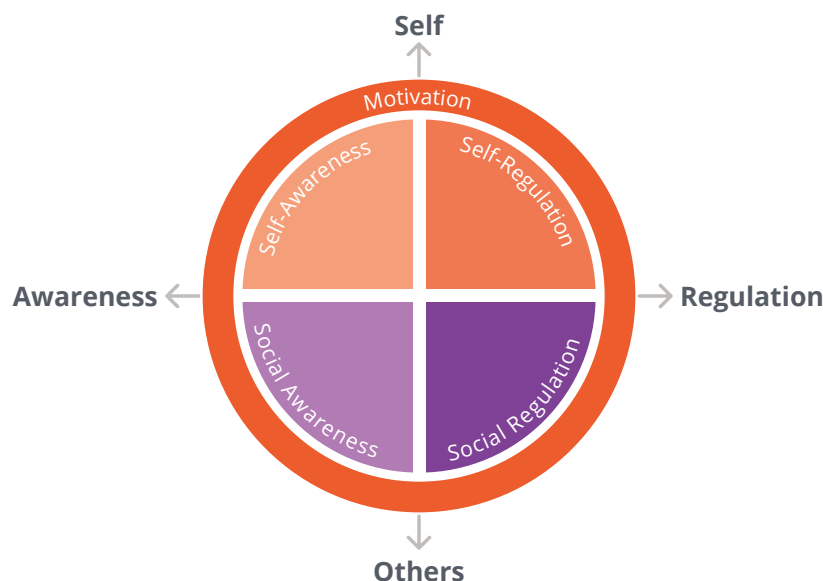

A Framework of Emotional Intelligence

This report is structured around five core dimensions of Emotional Intelligence. Each dimension reflects a distinct, yet interconnected, aspect of how emotions are perceived, processed, and applied. Together, they provide a comprehensive picture of how emotional patterns influence performance, relationships, and well-being.

- **Self-Awareness** is the ability to recognize and understand your moods, emotions, and drives. This dimension explores how actively a person notices and reflects on their emotions and the effect those emotions may have.
- **Self-Regulation** is the ability to control or redirect disruptive impulses and moods, and the tendency to suspend judgment and think before acting. This dimension explores how consistently emotional responses are managed and redirected to maintain balance and focus.
- **Motivation** is the passion to work for reasons that go beyond external drives such as knowledge, utility, surroundings, others, power, or methodology, and is based on an internal drive or tendency to pursue goals with energy and persistence. This dimension explores how purposeful emotional energy is channeled into meaningful goals and sustained effort.
- **Social Awareness** is the ability to understand the emotional makeup of other people and how your words and actions affect them. This dimension explores how attentively emotional cues in others are recognized and interpreted in social situations.
- **Social Regulation** is the ability to influence the emotional clarity of others through skill in managing relationships and building networks. This dimension explores how intentionally emotional dynamics are managed to guide interactions and support positive outcomes.

This report uses this framework to highlight current levels of activity, offer practical growth strategies, and explore how each area may influence day-to-day outcomes.
